1 In accordance with the national accounts conventions, transactions are recorded from the point of view of the rest of the world. A positive (negative) figure for the balances of the various items therefore corresponds to net expenditure (revenue) for Belgium in relation to the rest of the world. In particular, a positive (negative) overall balance corresponds to net borrowing (lending) by Belgium in relation to the rest of the world.

2 These are net amounts, i.e. the difference between incomes or transfers received from other sectors and those paid to other sectors, excluding transfers in kind.

3 These are net amounts, i.e. the difference between transfers received from other sectors and those paid to other sectors, including net acquisitions of non-financial non-produced assets and net acquisitions of valuables.

1 Concept of debt as defined in Council Regulation (EC) N°. 479/2009 of 25 May 2009 on the application of the Protocol of the excessive deficit procedure annexed to the Treaty establishing the European Community.

2 The endogenous change in the public debt is indicated by the difference between the primary balance required to stabilise the debt in % on GDP - i.e. the balance equal to the difference between the implicit interest rate and the nominal GDP growth rate, multiplied by the ratio between the debt at the end of the previous year and the GDP in the period considered - and the actual primary balance.

3 Percentage changes compared to the previous year.

4 A positive (negative) value means a factor increasing (reducing) the debt.

5 Excluding financial derivatives.
